TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript (ES6+), Java, SQL, Dart
Frontend & Mobile	React.js, Next.js (App Router), React Native, Angular, SwiftUI, Flutter, PWA
Backend & APIs	Node.js, Express.js, Flask, REST APIs, GraphQL, JWT, OAuth 2.0, NextAuth, Prisma ORM
Databases	PostgreSQL, MongoDB, Firebase, Redis, Oracle, SQLAlchemy
Cloud & DevOps	AWS (EC2, S3, Lambda), GCP (App Engine), Docker, Jenkins, CI/CD
AI & ML	LLM Integration (Anthropic Claude, Gemini), AI Agents, Claude Code, RAG Pipelines, LangChain

EXPERIENCE

Punita Group Inc. · Software Engineer — Sterling, VA July 2026 – Present

- ▶ **Pitched and built** an HTS tariff and duty tracking tool for a **~10,000-item catalog** and **660+ customs entries**, cutting each duty lookup from **20–30 minutes to ~5 minutes** for the import team.
- ▶ Modeled **27 duty layers** (Section 301, 232, IEEPA) across **400+ HTS codes** from the USITC schedule, flagging duty changes since each item's last entry and **catching 2 increases before shipment**.
- ▶ Set up a daily **AI agent (Claude)** that sweeps the company mailbox for customs entries, checks them against linked POs, invoices and containers across **120+ shipments**, flags errors and updates the database, **catching 5 misclassified PO lines**.

Easley-Dunn Productions, Inc. · Full Stack Engineer — Torrance, CA August 2025 – June 2026

- ▶ Built the complete **authentication flow** (sign-up, login, OTP verification, password reset) with React Native and Firebase Auth for a **production iOS/Android app with 30+ active users**, letting users recover locked accounts on their own.
- ▶ Designed **REST APIs** backed by PostgreSQL for in-app chat and **real-time location tracking**, letting users share their live location with trusted contacts in emergencies.
- ▶ Owned the **iOS release pipeline** in Xcode, fixing dependency issues and managing **TestFlight builds for testers and production** ahead of a **100+ student pilot**.
- ▶ Designed the initial Figma mockups used in early demos and built them into **15+ production React Native screens**.

Genesco · Web Application Intern — Nashville, TN July 2024 – August 2024

- ▶ Migrated a lagging Smartsheet ticketing workflow to a **Python/Flask backend on Oracle**, making ticket submission **70% faster**.
- ▶ Optimized SQLAlchemy queries with indexing (**30% faster**); containerized CI/CD with Docker and Jenkins (**40% faster deploys**).

Capgemini · Application Developer — Mumbai, India December 2021 – March 2022

- ▶ Built a cross-platform **Flutter MVP in 3 months** from Figma prototypes; added Google OAuth 2.0 SSO, **cutting login errors 25%**.

PROJECTS

Dear Diary – AI Journaling PWA

Tech: Next.js 14, PostgreSQL, Prisma, Anthropic Claude API

- ▶ AI journaling PWA with a **multi-persona Claude chat**, voice-to-text entries and a **7-model Prisma/PostgreSQL schema**.

StockApp – Stock Analytics Platform

Tech: Node.js, Express, Angular, TypeScript, MongoDB, GCP

- ▶ Candlestick charts and auto-refreshing quotes behind an Express proxy with a **server-side TTL cache** and a **background refresh job**, replacing one upstream call per stock with cached, parallel lookups.

EDUCATION

University of Southern California · M.S. Computer Science (GPA: 3.77)

August 2023 – May 2025

University of Mumbai · B.E. Computer Science (CGPA: 9.57/10)

August 2019 – May 2023
